RE: Health and Safety Inspection of November 19, 2018

Livingstone Range School Division #68 Health and Safety inspection of November 19, 2018 found the overall general condition of the school building is good and is compliant with today's standards. The windows, blinds, screens and doors are all functional and in good condition.

No items were found requiring immediate attention. Thank you to your staff and students for their continued respect and care for the building and resources contained therein.

National Fire Safety Code requires that wall art and posters cannot exceed more than 20% of total surface areas (ceiling, walls and floor). Please ensure your staff continue to adhere to this regulation.

As of March 1, 2019 Laura Stocker will officially be filling the role of Health and Safety for LRSD. Please contact Laura to schedule a follow-up visit after Monday, March 4, 2019. Your attention to the current Health and Safety legislation is anticipated and requested.
